

Mpox : Advisory for travellers from at risk countries

Due to the active spread of Mpox in Africa and particularly in **the Democratic Republic of the Congo (DRC), Rwanda, Uganda, Burundi, the Republic of the Congo, the Central African Republic and Kenya:**

➔ **If you are arriving from one of these areas and you develop a fever and a skin rash with blisters**, contact your doctor immediately or a free information, screening and diagnosis center (CeGIDD) to confirm the diagnosis and measures to put in place. **If you can contact neither or in case of an emergency, call 15** (National health emergency services).

For information on symptoms, treatment, prevention and vaccination, call:
